Website & Copilot

PhiloTech Salon, Apr 27

Schedule this morning

- How to set up a personal/club webpage
- Live demonstration: Github Copilot in Software Engineering
- Domestic LLMs: Coze and Kimi
- Resolving Accessibility: How to unlock GitHub Copilot for free

Why build a personal webpage?

If you are ...

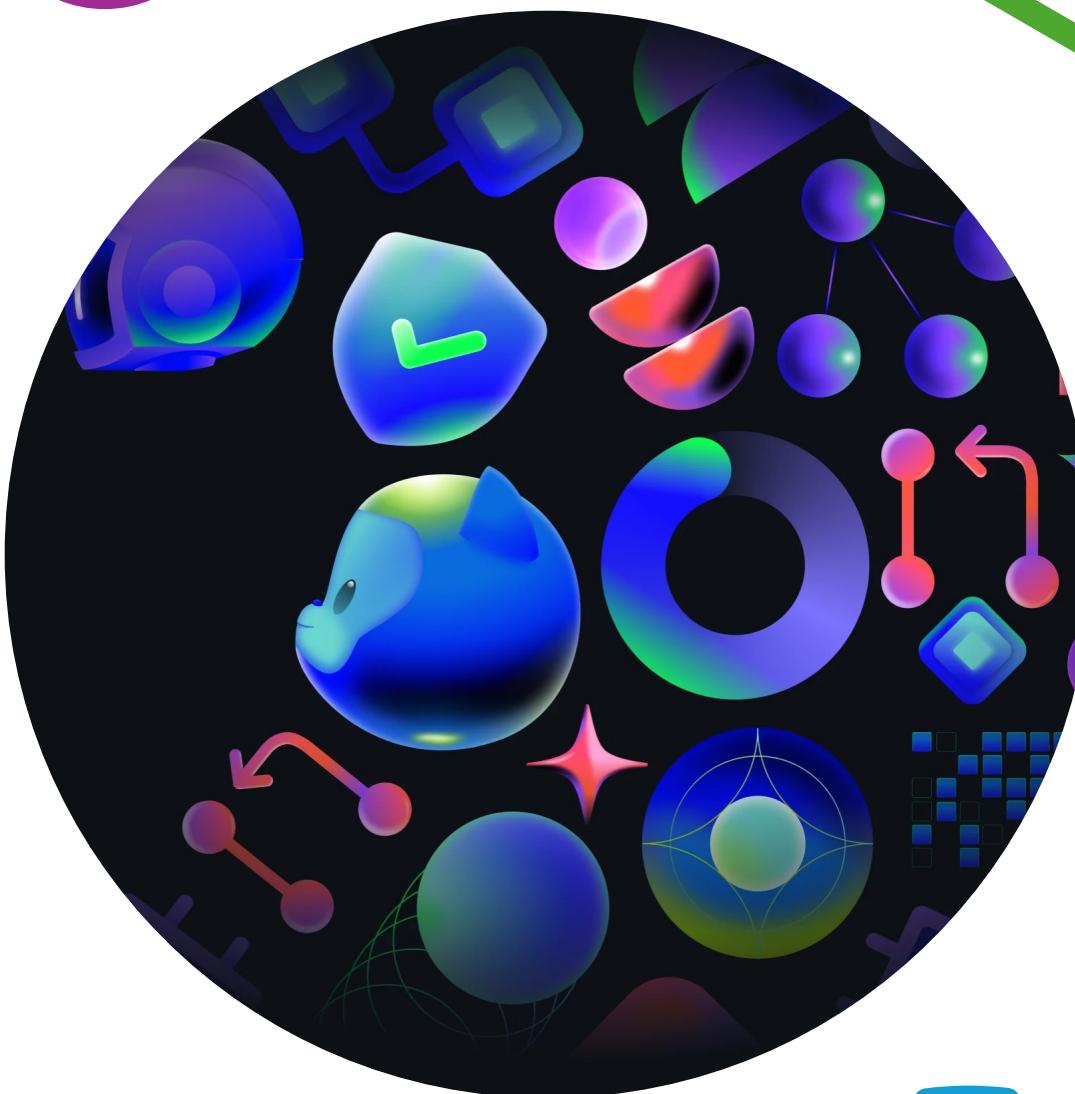

- a skilled programmer/engineer
- a PhD/MS applicant
- a scholar/professor in the “academic community”
- simply someone who loves “sharing their own experience”

You may want others to find you,
simply by searching in Google/Baidu.

What I found when surfing the internet ...

- [Tony Wang](#) (PhiloCoffee Club)
- [Saurabh Gupta](#) (ECE mentor)
- [Fei Gao](#) (ZJU FAST Lab)
- [Wei Wang](#) (Class of 2027, ZJUI)

An abstract circular graphic on the left side of the slide features a dark background with various glowing, translucent nodes and connections in shades of blue, green, purple, and red. The nodes are irregular shapes like spheres, cubes, and rings, some with internal patterns. A network of lines and arrows connects these nodes, creating a sense of a complex system or data flow.

A teacher stands at the front of a large lecture hall, pointing with a stick towards a chalkboard covered in mathematical equations. Students are seated in rows of green desks, looking towards the front. The scene is dimly lit, with light coming from windows on the right.
